Microscopic bronchiolitis

bronchiole (brong'kē-ol) n. 1. a subdivision of the bronchial tree, 1 mm or less in diameter, differing from the bronchi in having cuboidal epithelial cells and lacking cartilage plates. Each bronchiole subdivides into several smaller terminal bronchioles. In older terminology, called bronchiolet.

- Bronchiole, terminal bronchiole, respiratory bronchiole, alveolar duct, alveolus.
