

Supplementary Figure 1 Expression levels of SNHG5, miR-181c-5p and CBX4 in different types of NSCLC. A. Expression level of SNHG5 in different types of NSCLC; B. Expression level of miR-181c-5p in different types of NSCLC; C. Expression level of CBX4 in different types of NSCLC. Measurement data were expressed as mean \pm standard deviation. ns $P > 0.05$; adenocarcinoma (n = 38), squamous cell carcinoma (n = 31) and large cell carcinoma (n = 17).
