Figure 1 of the supplementary data. Flow-chart of patients’ selection for this study.

8,771 patients admitted for ACS
- 450 died within hospitalization
- 2,159 LVEF <0.50
- 1,641 HF within the hospitalization
- 349 previous HF

5,237 patients included in the analysis
- 999 (16.8%) patients died
- 626 (10.5%) died of cardiovascular causes

251 patients (3.4%) one HF readmission <1 year after the ACS

567 (9.5%) one HF readmission
**Figure 2 of the supplementary data.** Receiver operator curves for the diagnostic accuracy of the CardioCHUS-SanJuan HF score for heart failure readmission

![Receiver operator curves](image)

- **Heart failure re-admission during follow-up**
  - AUC 0.78 (95% CI 0.76-0.79)

- **Heart failure re-admission <1 year**
  - AUC 0.79 (95% CI 0.77-0.82)
