Appendix B. Scatterplots illustrating the associations (non-adjusted) tested in the study.

Fig. B.1. Scatterplots showing the correlation among body fat (%), measures of pressure hyperalgesia (pressure pain thresholds) (a – c) and self-reported pain (VAS) (d, e).

Abbreviation: VAS, Visual analogue scale.
Fig. B.2. Scatterplots showing the correlation among skeletal muscle mass (%), measures of pressure hyperalgesia (pressure pain thresholds) (a – c) and self-reported pain (VAS) (d, e). Abbreviation: VAS, Visual analogue scale.
Fig. B.3. Scatterplots showing the correlation among BMI, measures of pressure hyperalgesia (pressure pain thresholds) (a – c) and self-reported pain (VAS) (d, e). Abbreviations: BMI, Body mass index; VAS, Visual analogue scale.
