Diastolic Function Is Impaired in Patients With Prehypertension: Data From the EPIPorto Study

Table of the supplementary material. Comparison of Diastolic Function Classification Using the 2016 Joint Recommendations and the 2017 Clinically-oriented Algorithm With the Previous 2009 Joint Recommendations

| | EACVI/ASE 2016 recommendations | | | | 2017 clinically-oriented algorithm | |
|---|--------------------------------|---------------|------------|--|------------------------------------|------------|
| | No DD | Indeterminate | DD present | | No DD | DD present |
| <i>EACVI/ASE 2009 Recommendations</i> | | | | | | |
| No DD | 656 | 63 | 2 | | 471 | 251 |
| DD present | 127 | 71 | 6 | | 0 | 203 |
| | | | | | | |
| <i>2017 clinically-oriented algorithm</i> | | | | | | |
| No DD | 461 | 9 | 0 | | - | - |
| DD present | 322 | 125 | 8 | | - | - |

DD, diastolic dysfunction; EACVI/ASE, European Association of Cardiovascular Imaging/American Society of Echocardiography.
