

Supplementary data

Table 1 of the supplementary data. Risk scores in pulmonary arterial hypertension and variables included in the score

REVEAL 2.0 score
Revised REVEAL score with existing variables and revised risk points and new variables
Hospitalization within the last 6 mo
Estimated glomerular filtration rate < 60 mL/min 1.73m ² or renal insufficiency
Right heart score
Right ventricular function, using fractional area change
Right atrial enlargement index
Systolic blood pressure

Figure 1 of the supplementary data. Reproducibility of RVESRI

RVESRI, right ventricular end-systolic remodeling index; RVEF, right ventricular ejection fraction.
