Supplementary material

Figure S1 - Flow chart of the pediatric literature search and study selection.

n = 156 records identified through database searching

n = 132 records excluded:
- language other than English
- studies not evaluating FODMAPs diet intervention in children with FGIDs and abdominal pain as the predominant symptom.
- duplicates
- abstracts
- uncontrolled studies

n = 24 potentially relevant records retrieved for scrutiny

n = 14 full-text studies included in the review

n = 10 reviews/editorials

n = 3 studies on comprehensive LFM diet
n = 1 fructans-related Study
n = 5* lactose-related studies
n = 7* fructose-related studies
n = 3* sorbitol-related studies

* Including studies evaluating multiple dietary treatments.
